About Federal Elevator

Federal Elevator was created in 1988 with a mandate to produce high quality elevators at competitive price. More than 20 years later we have thousands of installations across North America and worldwide - keeping true to our promise and vision.

The Panorama is our standard residential Elevator model. It has capacity of 750lbs with an operating speed up to 36 fpm in both directions. The pump and controller can be accommodated inside a small closet space. The Panorama can be completely custom designed to suit specific personal requirements.

The Panorama Residential Elevator is the perfect solution for multilevel home. Designed with the customer in mind with a multitude of premium features, finishes and color options, delivering quite, smooth, dependable operation day in and day out.

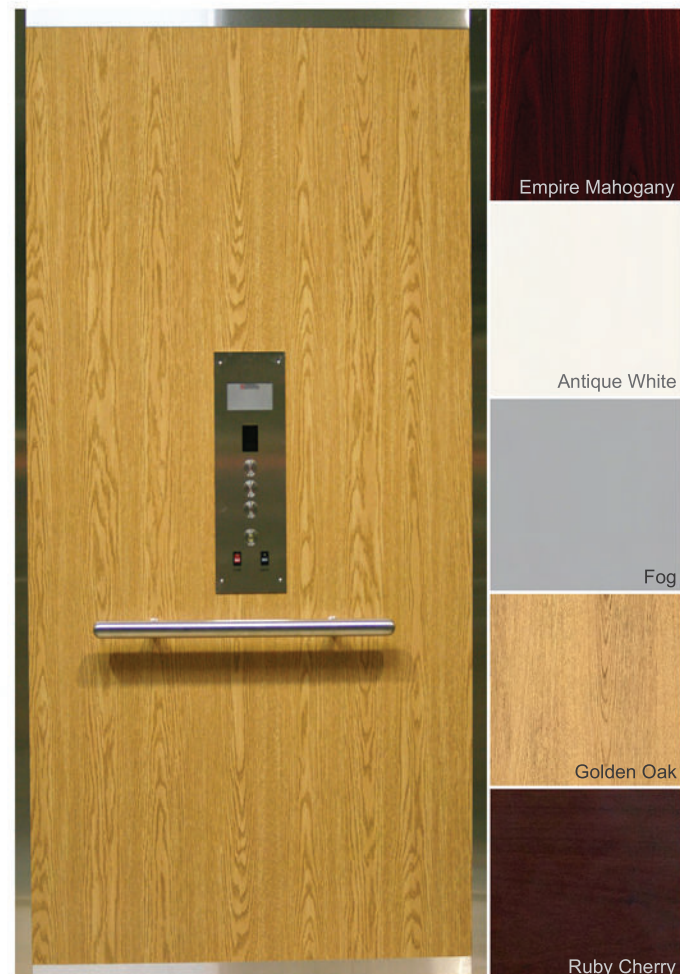

Our Elevator Cabs

The Panorama Residential Elevator provides many choices of interior panels, from simple unfinished natural wood veneers and melamine to custom recessed woods and glass walls interiors to choose from. Suiting your home décor has never been easier, with our standard choices of veneers, melamine, laminates and stains.

The cab platform includes our unmatched steel pan construction for great durability. Our elevator includes many customizable features, ensuring that we meet the needs of differing individual lifestyles.
